

Transmission Fluids

hyrax[®] ATF Dexron II D

Specially formulated using highly refined high viscosity index mineral oils

Smooth, jerk-free shift performance

Provide excellent thermal and oxidation stability at high temperatures

Improved cleanliness of transmission system

Description

Hyrax ATF Dexron II D is a modern, high performance quality fluid primarily intended for use in automatic transmissions and in many other applications where DEXRON[®] II fluids are specified. It functions as a universal transmission fluid because it satisfies the requirements of DEXRON[®] IID, Caterpillar TO-2, Ford CJ type fluid, Voith Daiwa and ZF transmissions.

Hyrax ATF Dexron II D is formulated from highly refined high viscosity index mineral oils and advanced additives system to provide excellent antiwear, corrosion resistance, friction retention, and thermal and oxidation stability at high temperatures as well as excellent low temperature characteristics.

Applications

Hyrax ATF Dexron II D is recommended for use in all automatic transmissions, power steering and other hydraulic systems for which a DEXRON[®] IID or Allison C-4 type fluid is specified.

Benefits

- Smooth, jerk-free shift performance
- A high level of protection under a wide range of service conditions
- Enhanced protection against wear to prolong transmission life
- Improved cleanliness of transmission system
- Excellent circulation and effective lubrication at low temperatures

Typical Characteristics

Properties	Method	Dexron II D
Color	Visual	Red
Density at 15°C, Kg/L	ASTM D4052	0.861
Flash Point, °C	ASTM D92	>180
Pour Point, °C	ASTM D97	-45
Viscosity at 40°C, cSt	ASTM D445	42.7
Viscosity at 100°C, cSt	ASTM D445	7.5
Viscosity Index	ASTM D2270	142

Performance

- GM DEXRON[®] IID
- Allison C-4
