

Specialty Oils

hyrax[®] Kleensol

Made from the finest straight
paraffinic base stocks

Contains solvent for cleaning
the internal components

Flushing will help to
prolong components
lifecycle

Remove and prevent rusting

Description

Hyrax Kleensol is a flushing oil made from the finest straight paraffinic base stocks, an additive system and a solvent for cleaning the internal components of equipment and machinery.

Applications

Hyrax Kleensol can be used as a flushing oil to increase oil life by ensuring that all engine parts are left clean and free from used engine oil deposits ready for fresh oil. It is also recommended for use in flushing circulation systems, gearboxes and other equipment to remove rust preventatives, dirt, construction debris and water prior to service or in older equipment which simply requires cleaning.

Typical Characteristics

Properties	Method	Flushing Oil
Appearance	Visual	Bright & Clear
Color		1.0
Density at 15°C Kg/L	ASTM D4052	0.865
Viscosity at 100°C, cSt	ASTM D445	>4
Pour Point, °C	ASTM D97	-9
